Vision of the University:

The University aspires to transform into a center of excellence in Science, Engineering and Technology, Arts and Business Administration programs by providing innovative, multi-disciplinary courses to the young generation of the country and beyond. It endeavors to make the University a hub of knowledge and be recognized as a leading university of the country.

Mission of the University

1. Providing state of the art education to achieve disciplinary knowledge, problem solving skill, ability to lead and communication skill.
2. Providing a collaborative environment enabling free exchange of ideas to flourish research, creativity and innovation.
3. To remain updated and responsive to the diverse needs of society and transform in a sustainable way.

Vision of the department of Computer Science and Engineering:

The Department of Computer Science and Engineering aspires to produce highly competent and skilled students to excel in research and innovation for sustainable development.

Mission of the department of Computer Science and Engineering:

DM1 To educate students to meet with the new challenges in the progress of computer science, and software and information technology, to provide innovative, creative solutions for societal needs.

DM2 To create and disseminate innovative knowledge through basic and applied research in the Computer Science and Engineering.

DM3 To contribute in the development of skilled human resources to impact society in a sustainable way.

Program Educational Objectives (PEOs)

PEO-1	Graduates will progress in their chosen profession and achieve career advancement in their respective field.
PEO-2	Graduates will demonstrate ethical behavior, teamwork, and leadership in professional environments.
PEO-3	Graduates will identify, develop, and apply relevant and evolving technologies to contribute effectively in professional and entrepreneurial roles.
PEO-4	Graduates will apply their knowledge and skills aligned with relevant Sustainable Development Goals for societal development.

Program Learning Outcomes (PLOs):

Program Learning Outcomes (PLOs) ensures that the knowledge, skills and attitudes the students will achieve at the end of a four years BSc. engineering degree. Department of CSE, BAUST has 12 Program Learning Outcomes as described below.

1. **PLO1: Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.

1. **PLO2: Problem analysis:** Identify, formulate, research the literature and analyze complexengineering problems and reach substantiated conclusions using first principles ofmathematics, the natural sciences and the engineering sciences.

1. **PLO3: Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety as well as cultural, societal and environmental concerns.

1. **PLO4: Investigation:** Conduct investigations of complex problems, considering design of experiments, analysis and interpretation of data and synthesis of information to provide valid conclusions.

1. **PLO5: Modern tool usage:** Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

1. **PLO6:** The engineer and society: Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice.

1. **PLO7:** Environment and sustainability: Understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of, for sustainable development.

08 Feb — Publication of Results Summer 2025 (Regular) and

14 Jan — Final Examination Result of Summer 2025 (Regular) and

06 May — Seminar on "Shedding Light on the Black Box: The Role

1. **PLO8:** Ethics: Apply ethical principles and commit to professional ethics, responsibilities and the norms of the engineering practice.

1. **PLO9:** Individual work and teamwork: Function effectively as an individual and as a member or leader of diverse teams as well as in multidisciplinary settings.

0. PLO10: Communication: Communicate effectively about complex engineering activities with the engineering community and with society at large. Be able to comprehend and write effective reports, design documentation, make effective presentations and give and receive clear instructions.

0. **PLO11:** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work as a member or a leader of a team to manage projects in multi-disciplinary environments.

0. **PLO12:** Life-long learning: Recognize the need for and have the preparation and ability to engage in independent, life-long learning in the broadest context of technological

PEO Statements Mapping/Relationship with the departmental Mission

Program Educational Objectives (PEOs) describe the career and professional accomplishments that the program is preparing graduates to achieve. Basically those graduates have worked for at least 3 years after graduation, PEOs are assessable based on their attributes and accomplishments. PEO Statements and program mission statement relationship/mapping are presented below.

PEO Statement Mapping with The Department Mission

PEO No.	PEO statement	DM1	DM2	DM3
PEO-1	Graduates will progress in their chosen profession and achieve career advancement in their respective field.	YES		YES
PEO-2	Graduates will demonstrate ethical behavior, teamwork, and leadership in professional environments.	YES	YES	
PEO-3	Graduates will identify, develop, and apply relevant and evolving technologies to contribute effectively in professional and entrepreneurial roles.	YES	YES	
PEO-4	Graduates will apply their knowledge and skills aligned with relevant Sustainable Development Goals for societal development.	YES		YES

PEO Statement Mapping with the University Mission

No	PEO Statement	Institutional Mission Statements		
		Mission Statement 1	Mission Statement 2	Mission Statement 3
PEO-1	Graduates will progress in their chosen profession through pursue a degree in the respective field of study and get advancement in career.	YES	YES	
PEO-2	Graduates will build reputation through appreciation from others by demonstrating their dependability as successful and ethical team members and achieving leadership roles in organizations and/or on teams.	YES	YES	
PEO-3	Graduates will develop, identify, and apply relevant and current technologies, skills, and resources to build and operate sustainable business enterprises through a variety of career paths.	YES	YES	YES
PEO-4	Graduates will contribute to society's educational, cultural, social, technical, and economic growth by using their knowledge and skills ethically.			YES

The program outcomes (POs) and their alignment with PEOs are shown in the following table.

The program outcomes (POs) and their alignment with PEOs

PO No.	PO statement	PEO 1	PEO 2	PEO 3	PEO 4
PO1	**Engineering knowledge:** Apply knowledge of mathematics, natural science, engineering fundamentals and an engineering specialization as specified in K1 to K4 respectively to the solution of complex engineering problems.	yes			
PO2	**Problem analysis:** Identify, formulate, research literature and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences. (K1 to K4)	yes			

PO3	**Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety and of cultural, societal and environmental concerns. (K5)	yes			
PO4	**Investigation:** Conduct investigations of complex problems using research-based knowledge (K8) and research methods including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusions.	yes			
PO5	**Modern tool usage:** Create, select and apply appropriate techniques, resources and modern engineering and IT tools, including prediction and modeling, to complex engineering activities with an understanding of their limitations. (K6)	yes		yes	
PO6	**The engineer and society:** Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice and solutions to complex engineering problems. (K7)				yes
PO7	**Environment and sustainability:** Understand and evaluate the sustainability and impact of professional engineering work in the solution of complex engineering problems in societal and environmental contexts. (K7)			yes	yes
PO8	**Ethics:** Apply ethical principles and commit to the professional ethics, responsibilities and the norms of the engineering practice. (K7)	yes	yes		yes
PO9	**Individual work and teamwork:** Function effectively as an individual and as a member or leader of diverse teams and in multidisciplinary settings.		yes		
PO10	**Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.	yes			yes
PO11	**Project management and finance:** Demonstrate knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.		yes	yes	
PO12	**Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.	yes			yes
